

AE4311 Syllabus

Aircraft Design I: Conceptual Design, 3 Undergraduate Credits

Hours: 2(lecture) + 0(studio) + 3(lab) = 3 credit hours

General Information

Description

Conceptual design and synthesis of fixed wing aircraft.

Pre- &/or Co-Requisites

Pre-requisite: AE3330 Introduction to Aerospace Vehicle Performance

Course Goals and Learning Outcomes

Upon completion of this course, the student should be able to:

- Develop and recommend detailed aerospace system requirements
- Effectively communicate technical information in both oral and written formats
- Select and employ systems engineering concepts and terminology to solve lab/homework practice problems
- Integrate design needs and requirements with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- Recognize value of analyzing dilemmas and identifying courses of action that honor ethical and professional responsibilities in engineering work
- Compare and contrast aircraft configurations and layout
- Conduct system sizing analyses and trade studies
- Model aircraft cost throughout the vehicle life cycle by analyzing major contributing factors

Course Requirements & Grading

Assignment	Date	Weight (Percentage, points, etc)
Lab/Homework Assignments	Assignments due every week	80% (approximately 5.5% per assignment)
Weekly Reading Quizzes	Quizzes due every week	20% (approximately 1.5% per quiz)

This class does not have a final exam.

Extra Credit Opportunities

Extra credit assignments will be presented to the class on a case-by-case basis in addition to the regularly assigned work. Examples of possible extra credit assignments would be to re-work the lab activities, conduct a more in-depth study of a particular topic and present to the class, create new content and present it to the class, etc. Please contact the instructor if you want to discuss possible opportunities for extra credit.

Description of Graded Components

Lab/Homework Assignments: Consists of weekly lab assignments which are due throughout the semester. Each assignment will be based on a worked lab using subject material covered in class that week. The

required lab portion is instructional in nature, is individually completed, and is meant to be completed during the weekly lab class. Most lab assignments will be done during the lab period and due the same day, although some assignments needing more time may have extended due dates. Completed lab assignments will be submitted via Canvas. Use proper units when appropriate. Deductions will be made for improper lab assignment format.

Weekly Reading Quizzes: Reading will be assigned weekly. Weekly multiple choice quizzes are to be completed on Canvas by the day and time they are due.

Grading Scale

At Your final grade will be assigned as a letter grade according to the following scale:

A	90-100%
B	80-89%
C	70-79%
D	60-69%
F	0-59%

Full credit is awarded for solutions that are correct and demonstrate an understanding of the concepts of the problem. Partial credit is given for solutions that, while incorrect, demonstrate some knowledge of the concepts. Final grades may be curved based on overall class performance.

Course Materials

Course Text

Required Text: Roskam, Jan, *Airplane Design Parts I-VII*, DARcorporation, Third Printing, 2003;
Parts I, II, IV, and V are mandatory; others are recommended

Course Website and Other Classroom Management Tools

Course materials will be posted online to Canvas (<https://canvas.gatech.edu/>). Course materials (e.g. recorded videos) will be available to both in person and distance learning sections. Important communications to the class will be sent through the Canvas system; please be alert to these messages. Students will be held responsible for any message or announcement that has been posted to the class for more than 24 hours.

Course Expectations & Guidelines

Academic Integrity

Georgia Tech aims to cultivate a community based on trust, academic integrity, and honor. Students are expected to act according to the highest ethical standards. For information on Georgia Tech's Academic Honor Code, please visit <http://www.catalog.gatech.edu/policies/honor-code/> or <http://www.catalog.gatech.edu/rules/18/>.

Students are required to report any suspected violation of the Honor Code to the Instructor whether or not they were directly involved in the incident.

Any student suspected of cheating or plagiarizing on a quiz, exam, or assignment will be reported to the Office of Student Integrity, who will investigate the incident and identify the appropriate penalty for violations.

Accommodations for Students with Disabilities

If you are a student with learning needs that require special accommodation, contact the Office of Disability Services at (404)894-2563 or <http://disabilityservices.gatech.edu/>, as soon as possible, to make an appointment to discuss your special needs and to obtain an accommodations letter. Please also e-mail me as soon as possible in order to set up a time to discuss your learning needs.

Attendance and/or Participation

Classroom attendance, either in person or remotely, is strongly encouraged but not required. Active participation is essential for understanding major concepts and contributing to the learning of others.

Absences related to personal illness or emergency, or career development (e.g. presenting a paper at a conference or scheduled job interview) are considered excused. Please contact the instructor as soon as you know of a schedule conflict if this applies to you. Please see the Institute Absence Policy - <https://catalog.gatech.edu/rules/4/> for more information.

Collaboration & Group Work

Discussions with other students about how to solve homework problems are allowed and encouraged; however, all work turned in must be the student's own original work.

The use of outside references (e.g. textbooks) is expected and encouraged; when appropriate cite any referenced material that is used.

Use of homework solutions from prior semesters (if/when applicable) is not allowed.

Extensions, Late Assignments, & Re-Scheduled/Missed Exams

Homework assignments are due at the designated time using online submission on Canvas. Any assignment turned in after collection is late. Late homework assignments may be turned in during the advertised grace period (usually 48 hours) for half credit. Any homework turned in after this is not counted.

Students in a distance learning section will receive a standard 1-week delay on all assignment and exam due dates.

Excused absences (see above) may be a justification to receive an extension on an assignment. Please contact the instructor as soon as you know of a schedule conflict if this applies to you. Under special circumstances and at least two weeks of advance coordination with the professor, labs may be rescheduled for an individual. Labs missed due to illness or other emergencies can be made up, but must be supported by appropriate documentation coordinated through the Dean of Students. The professor reserves the right to grant special dispensations when deemed appropriate.

Student-Faculty Expectations Agreement

At Georgia Tech we believe that it is important to strive for an atmosphere of mutual respect, acknowledgement, and responsibility between faculty members and the student body. See <http://www.catalog.gatech.edu/rules/22/> for an articulation of some basic expectation that you can have of me and that I have of you. In the end, simple respect for knowledge, hard work, and cordial interactions will help build the environment we seek. Therefore, I encourage you to remain committed to the ideals of Georgia Tech while in this class.

Student Use of Mobile Devices in the Classroom

Mobile Devices (laptop computers and tablets) may be used in class to enhance your learning experience, provided they are used in support of the class and are not a distraction to you or your classmates. Viewing materials unrelated to the class and doing homework in class is not allowed. Cell phones should be set to silent mode during class. If you must answer a phone call during class, please step outside so as not to disturb the class.

Additional Syllabus Components

Honesty:

The School of Aerospace Engineering values honesty and integrity of all members of our community. An important element of this value is the academic honor code.

Georgia Tech Honor Challenge Statement: I commit to uphold the ideals of honor and integrity by refusing to betray the trust bestowed upon me as a member of the Georgia Tech community.

Honor Code: http://policylibrary.gatech.edu/student-affairs/academic-honor-code#Article_1:Honor_Agreement

Well Being:

The School of Aerospace Engineering values the complete well-being of all members of its community, which includes professional, physical, spiritual, emotional, and social dimensions. There are numerous resources to support the health and well-being of all members of our community:

<https://gatech.instructure.com/courses/108574>

Mental Health Resources:

Emergencies: Can either Call 911 or call Campus Police at 404.894.2500 <http://www.police.gatech.edu/>

Center for Assessment, Referral, & Ed. (CARE): <https://care.gatech.edu/> 404.894.3498 (Counselor On-Call)

Counseling Center: <https://counseling.gatech.edu/> 404.894.2575

Stamps Health Services: <https://health.gatech.edu/> 404.894.1420

Student Life and Dean of Students: <https://studentlife.gatech.edu/content/get-help-now> 404.894.6367

Victim-Survivor Support (VOICE): <https://healthinitiatives.gatech.edu/well-being/voice> 404-385-4464/(or 4451)

National Suicide Prevention Lifeline: 1.800.273.TALK (8255)

Georgia Crisis and Access Line: 1.800.715.4225

Social Justice:

The School of Aerospace Engineering values social justice for all members of the Georgia Tech community and the larger society. Social justice means that everyone's human rights are respected and protected. We stand committed in the fight against racism, discrimination, racial bias, and racial injustice. Our shared vision is one of social justice, opportunity, community, and equity. We believe that the diversity and contributions from all of our members are essential and make us who we are. We believe that our impact must reach beyond the classroom, research labs, our campus, and the technology we create, but must also improve the human condition where injustice lives. We will continue to work to understand, value, and celebrate all people and create an inclusive educational and work environment that welcomes all.

As a matter of policy, Georgia Tech is committed to equal opportunity, a culture of inclusion, and an environment free from discrimination and harassment in its educational programs and employment. Georgia Tech prohibits discrimination, including discriminatory harassment, on the basis of race, ethnicity, ancestry, color, religion, sex (including pregnancy), sexual orientation, gender identity, national origin, age, disability, genetics, or veteran status in its programs, activities, employment, and admissions.

Course Schedule

The following outline lists the topics to be covered in the course and tentative dates for exams. Changes to the outline will be discussed in class, and updated versions will be uploaded as necessary to Canvas.

Lecture	Topic	Assignment
1	Introduction to Design and Course Logistics	
2	Report Writing Guidelines	Lab 1 due
3	Aerospace System Life Cycle	
4	Requirements Definition Part I	Lab 2 due
5	Requirements Definition Part II	
6	Mission Development & ConOps	Lab 3 due
7	System Hierarchy and WBS	
8	Project Management and Scheduling	Lab 4 due
9	Introduction to Systems Engineering	
10	Systems Engineering Tools	Lab 5 due
11	TRL and Technology Development	
12	Risk and Reliability	Lab 6 due
13	Socio-Economic and Ethical Considerations in Design	
14	Design Optimization Basics	Lab 7 due
15	Design Optimization Part II	
16	Configuration Development Part I	Lab 8 due
17	Configuration Development Part II	
18	Configuration Development Part III	Lab 9 due
19	Configuration Development Part IV	
20	Aerodynamics and Performance Review Part I	Lab 10 due
21	Aerodynamics and Performance Review Part II	
22	Weight Sizing Part I	Lab 11 due
23	Weight Sizing Part II	
24	Trade Studies	Lab 12 due
25	Constraint Sizing Part I	
26	Constraint Sizing Part II	Lab 13 due
27	Life Cycle Cost Part I	
28	Life Cycle Cost Part II	Lab 14 due
29	Semester Summary	

This course does not have a final exam.
